

Luka Beograd – Case of emergency

Belgrade, February 11th 2012 - The employees in Luka Beograd are making great human and technical efforts for two days, in order to overload 700 tonnes of salt for “Beograd put”, despite the captured barge in Luka Beograd’s pool due to ice forming. The additional effort is also made for additional amounts of salt that are transported by wagons, so that Beograd put could clean the streets and roads from snow by salt sprinkling.

Today and tomorrow are organized additional shifts in Luka Beograd in order to overload salt on time, despite extreme coldness and bad weather.
