

## **Luka Beograd won another legal dispute**

The verdict of the Commercial Court in Belgrade again confirmed the claims which Luka Beograd had already publicly stated on several occasions, thus denying the statements of non-expert individuals that legal procedure was breached during the Takeover bid of Luka Beograd's shares by Worldfin.

In the elaboration of the verdict, which was reached in favour of Luka Beograd, it is clearly stated that the value of shares is defined on the market according to supply and demand principle, that the shareholders sold their shares of their own free will, that there was only one takeover bid so that the shareholders could either accept or refuse it, the entire procedure was completely transparent and all legal acts and procedures were followed.

This verdict is highly important for Luka Beograd because it refutes a number of false claims which were levelled at it by the Anti-Corruption Council among others and therefore we decided to publish it in its entirety.
